

Sealcoat Terms of Service

CONDITIONS, SPECIFICATIONS, WARRANTY, EXPLANATION OF SERVICES

All employees complete extensive training prior to employment and are full time professionals. All projects are supervised by the Owner or Crew Manager. All asphalt surfaces are prepared by power blowing. Removal of moss, imbedded debris, chemicals, etc. will require extra cleaning and will be charged on a case-by-case basis. Paver Restoration, Inc. is not responsible for Acts of God, including but not limited to rain, snow, flood, high winds, animal tracking, vehicle damages, lawn chemicals, road salt, snow plowing, tree sap, mulch, or any unforeseen materials that may affect the appearance or long term adhesion or wear ability of the sealer.

SEALCOATING: We fully warranty all workmanship and materials as specified for 30 days unless otherwise specified. A coating of approximately 8-12mm. per coat of a asphalt base fortified with Coal Tar will be applied. All coatings will have a mixture of pure sifted silica sand mixed at a minimum ratio of 1 lb. of sand per gallon of sealer. All coatings will contain latex additives for increased flexibility, surface durability, longevity, and deeper, darker, longer lasting color. All coating is neatly applied ONLY to asphalt surfaces by hand. Sealcoating is a protective and cosmetic coating designed to protect the current asphalt surface from further degradation and is no way a substitute for a newly paved or resurfaced asphalt surface. Sealcoating will not remedy low spots or hide defects in the surface. Some areas in the asphalt surface may appear rougher than the others or not coated as well, when in fact existing defects in these areas have become more apparent as a result of the black coating, and the rough areas are a result of a higher stone content than sand content in that particular area. Paver Restoration, Inc. will fully warranty surfaces that have been properly installed and have been either unsealed or previously prepared and sealed according to industry standards. Surfaces sealed with inferior materials, or improperly prepared prior to our service may affect the long-term wear. Normal wear and tear is not warranted such as, snowplow damage, lawn chemicals, tree sap, petroleum damage, imbedded dirt and debris etc.

CRACK SEALING: For an additional charge all crack sealing will be completed with a rubberized crack sealant. All structural cracks 3/8" or larger will be filled prior to sealcoating. Surface cracks (nonstructural cracks) will be filled by the sealcoating process to prevent water penetration. These cracks will not be pretreated and will still be visible. Cracks larger than 1 1/2 inch will be filled to prevent water penetration and be sealed to within 1 1/2 inch of the surface height. Settling of the crack sealing material is normal and will in no way affect the integrity of the process. All crack sealing material will be leveled to the surface of the driveway. Crack sealer will not be raised, and leveling the crack sealer to the surface or fractionally below provides protection from the crack sealing material being scraped or ripped out by the snow plowing process or by any other scraping process. Crack sealing will not make cracks disappear and cracks may still be visible after the sealcoating process. Crack repair material may settle. Once again, this in no way affects either the integrity or the watertight seal of the sealant. Paver Restoration Inc. offers no warranty or guarantee, written, express or implied, unless otherwise stated.

PATCHING: All asphalt patching and repair is completed using only highly durable cold patch unless otherwise specified. Patching will sometimes be visible after the sealcoating process as the name patch implies. We offer no warranty written, express or implied unless otherwise stated.

OIL SPOTS: Treated and cleaned, however, spots may still bleed through.

PAYMENT TERMS: Payment is due upon completion of job unless otherwise specified. Any balances past 30 days will be subject to interest and finance charges of 1.5% per month. All jobs quoted at \$500 or more require a \$200 deposit. Deviations from the proposal, unforeseen, or extra work beyond that indicated will be charged accordingly when approved by the customer.

Failure to provide 24 hours notice of cancellation of appointment will result in \$25 service charge.

In the event that Paver Restoration, Inc. institutes legal proceedings to collect any unpaid sums due hereunder, then it shall be entitled to receive as part of any award and/or judgment in its favor and against the defaulting party, its reasonable costs of collection, including without limitation, attorney's fees and court costs.
