A Pavement Maintenance Program That Includes Periodic Sealcoating And Crack Filling Will More Than Double The Service Life Of Asphalt Pavement.

- Scheduled Pavement Maintenance Program Curve
 - Pavement Deterioration Curve - No Scheduled Maintenance

Superior Protection

PROTECTION FROM OXIDATION

RAIN SNOW FROST

PROTECTION FROM MOISTURE

PROTECTION FROM CHEMICALS

Sealed vs. Unsealed

Sealed vs. Unsealed...

Problem: Left untreated, asphalt pavement will deteriorate rapidly. The asphalt binder that holds the pavement together begins to oxidize and weather soon after installation. Moisture penetrates the asphalt causing further damage and deterioration to the pavement.

Solution: SealMaster LV Asphalt Based Pavement Sealer replenishes the binder that is lost through weathering and aging, and provides superior protection against environmental distress.

SealMaster LV Asphalt Based Pavement Sealer restores the original black color to asphalt and greatly enhances the overall appearance of your property.

Product Description...

SealMaster LV is a clay-stabilized asphalt based pavement sealer fortified with coal tar for added fuel resistance and durability. SealMaster LV is ideal for beautifying and protecting all asphalt pavement surfaces including parking lots, driveways, airports, shopping malls, roadways, and more. SealMaster LV provides the advantages of both asphalt and coal tar in one product.

Professional Service...

SealMaster pavement sealers are applied by our nationwide and world-wide network of qualified pavement maintenance professionals to assure optimum product performance and customer satisfaction.

Meeting And Exceeding Industry Standards- SealMaster LV Asphalt Based Pavement Sealer meets the performance standards of ASTM D-2939.
